

***Exiguobacterium* sp. CCB-MMP238**

<p>Colony morphology</p>	<p>Beige; 2-3 mm; circular; entire; flat; glistening; opaque</p> 	
<p>Gram-stain</p>	<p>Positive rod</p>	
<p>Isolation medium</p>	<p>Marine Agar (MA)</p>	
<p>Growth condition</p>	<p>Aerobic;pH7;28±2°C; 24-48hrs</p>	
<p>Sampling date, location, source</p>	<p>15 May 2014; Matang Mangrove Forest, Perak (4.85496°E, 100.73495°N); Sediment</p>	
<p>Biochemistry/ Physiology</p>	<p>No</p>	
<p>16s rRNA gene analysis(EzBioCloud/N CBI)</p>	<p>Top-hit taxon</p>	<p><i>Exiguobacterium profundum</i></p>
	<p>Top-hit strain</p>	<p>10C</p>
	<p>Similarity (%)</p>	<p>99.84%</p>
	<p>Top-hit taxonomy</p>	<p>Bacteria;Firmicutes;Bacilli;Bacillales;Exiguobacteriaceae;<i>Exiguobacterium</i></p>
<p>Publication</p>	<p>No</p>	
<p>Application</p>	<p>No</p>	
<p>Isolated by</p>	<p>Siti Nur Fatin binti Ahmad Kamal</p>	
<p>Risk group</p>	<p>1</p>	
<p>Additional information</p>
